- CHMSU in partnership with the Ateneo Center for English Language Teaching successfully held the The workshop on “Using Pedagogical Translanguaging in Teaching English: Responding to the Challenges of the MATATAG Curriculum” from May 25-26. It was led by the workshop committee from the CHMSU BA English Language program.
- The Center for Internationalization and External Relations hosted the return of SDGs Unplugged Virtual Chat Series for 2026 with a session on “The Flow to Recovery after Disasters” with Senior Program Officer Gabrielle Espinosa of Nature’s Spring Foundation, Inc. last May 28, 2026.

POLICY ISSUE at a Glance

(2023-06)

Crucial ICT Reforms for the Digital Economy

The digital sector cuts across different markets and industries of the economy. However, gains from the digital economy may be hampered by setbacks in the information and communications technology (ICT) industry. Improving industry competition, ICT coverage, and service quality is essential for the broader and more productive use of digital technologies.

This infographic provides an overview of the digital value chain and the ICT performance of the Philippines. Barriers to entry and expansion in the internet connectivity segment are also presented, along with recommendations to strengthen the foundations of the digital economy.

PROTECT THE ENVIRONMENT
#MayMagagawa #PeopleEconomics #PeoplesONA2019

We want to see:

- ✓ conservation, protection, and improvement of the Philippine environment
- ✓ sustainable use of natural resources to meet the needs of Filipinos and for the country's economic development

Destruction and Plunder of PH Environment

WHAT CAN BE DONE?

- Drive for environmental sustainability with long-term programs
- Establish foreign and business partnerships (utilization of the country's natural resources)
- Explore, conserve, rehabilitate, and develop the country's natural resources and reserve base for the Filipino people's use
- Push for people's participation and consent, especially indigenous communities, in planning and promoting the environment
- Lower the production sector using environmentally sound methods

PH AIMS FOR SUSTAINABLE GROWTH

- 100% coverage of environmental protection activities nationwide
- Nearly 100% of PH total forest area
- 132 relatively degraded or biologically dead
- 1.8M sq. of marine habitats
- 71.4% growth in PH total regional and national protected areas

THE INTERNET VALUE CHAIN

CONTENT RIGHTS	ONLINE SERVICES	ENABLING TECHNOLOGY/SERVICES
<p>Content rights can be monetized when owners sell distribution licenses to entities, like media companies, who may also earn from repurposing or circulating their content. These may include:</p> <ul style="list-style-type: none"> • Distribution rights for video and music • Internet material by content creators 	<p>This refers to a range of activities that facilitate online transactions. Revenues are earned from providing services in:</p> <ul style="list-style-type: none"> • E-commerce • Entertainment (e.g., streaming, gaming) • Search, information, and reference (e.g., Google, Wiki) • Communications and social media 	<p>These are the “hidden” part of the internet value chain that provides the technology needed to support the delivery of online services. Firms of this kind earn from providing services like:</p> <ul style="list-style-type: none"> • Design and hosting • Payment platforms • Online advertising • Cloud-based platform services • Internet of Things
INTERNET ACCESS CONNECTIVITY	USER INTERFACE	
<p>These services are paid for by users to connect to the internet. Internet connections can be fixed or mobile, wired or wireless. Internet service providers include:</p> <ul style="list-style-type: none"> • Telecommunications operators • Mobile virtual network operators (MVNOs) • Cable TV operators • Satellite service providers <p>Source: AT Reimay (2018). GSMA, 2021</p>	<p>This refers to the point at which end-users can access internet-related services through a hardware device like a phone or personal computer, along with operating systems and software, which may be purchased separately. Other devices and software include:</p> <ul style="list-style-type: none"> • App stores • Wearables (e.g., smartwatch, VR/AR headsets) • Smart home devices and appliances • Security software (e.g., VPN, anti-virus software)
